

AirVision/WaterView

Data Management for Real-Time Water Quality Monitoring

Program Features

Reliable, accurate, real-time data

No matter what your application involves, at the end of the day it all comes down to the integrity of your data.

Agilaire is well known for providing the most reliable, accurate data for air quality, and is expanding to offer the same reliability in its water quality monitoring program.

- Proven data integrity
- Direct interface to sondes-no data logger required
- Multiple communication and distribution modes
- Real time trend display
- Generate multiple reports
- Modern alarm notification

Simple, turn-key, cost-effective solutions

At Agilaire, we value our customers - their needs and budgets. For that reason, our products are designed from the ground up with ease-of-use and affordability foremost in mind.

Application expertise

Agilaire is known for delivering cost effective, reliable products, and our ongoing commitment to innovation enables us to develop cutting-edge solutions.

Partnership Opportunity

Agilaire Corporation continues to partner with organizations that provide complementary products and/or services to our data loggers and water quality/resting services.

Contact us for further information regarding partnership opportunities.
