Winter Agilaire Air Newsletter

EPA Asset Tracking and GAO Report: Agilaire Strategy

EPA has recently released a rough guidance document and call for information from agencies regarding the tracking of assets (analysers, loggers, calibrators, reference standards, etc.) As you may know, Agilaire has offered an optional CATS module (Component and Activity Tracking System, aka Asset Tracking and Work Items), which currently fulfills a majority of the draft EPA requirements. We have reviewed the requirements and added development tasks to meet the remainder of the current draft requirements (primarily a few new fields, like planned retirement date, acquisition cost, etc.) We have also prepared a document detailing current capabilities and planned enhancements to be used in response.

The document can be downloaded from [here](#).

Two video tutorials on Asset Tracking and work items can be viewed here:

[CATS module](#)

[CATS and Electronic Logbook Demo](#)

All requests for support / new issue submissions made via email should be sent to: support@agilaire.com.

Agilaire Newsletter:

Please share this Agilaire newsletter ([via this link](#)) with others that you believe would benefit from its contents:

As always, thanks again for your support, suggestions, and business!

Sincerely,
Steve Drevik
President, Agilaire, LLC

& the Agilaire Team
