## Spring Agilaire Air Newsletter

### Changes for Asset Tracking

EPA released a memo last fall indicating they are working on a guidance document for tracking assets. While the final guidance is not yet available, Agilaire has already started updating our Component and Activity Tracking System (CATS, aka Asset and Work Items) to include some of the new recommended fields (such as Planned Retirement Date, Acquisition Cost, etc.), and we will be following the final guidance closely. For more info about the CATS module, contact info@agilaire.com. A demonstration video from our last user group meeting is available at [on this link](#).

### Changes for Cylinder Gas Verification Program (CGVP)

EPA has postponed the requirement for AQS reporting changes from August 2023 to end of year. Agilaire is updating the existing cylinder management features in the CATS module, but also will be offering a stand-alone Cylinder data entry form for users without the CATS module to fulfill the AQS reporting requirements. We expect this work to be completed and available this summer, and it will be covered in a future User Group meeting and tutorial video. If you would like to be added to the User Group notifications, please complete [this form](#).

### AirVision 4.6 (Build 118) Released!

After a long testing period, we're happy to report the availability of AirVision version 4.6 (Build 118) for download. Enhancements include:

- Expansion of fields for Asset Tracking, significant improvements in user interface and tracking of certification history.
- Improvements for RD/RB AQS reporting for blanks and CCV records for auto-GC (PAMS) parameters.
- Added Four Highest Ozone Values report.
- Support for Direct polling of Campbell Scientific (CSI) loggers with Ethernet connections via their Web API.
- Fix CV% / Bias % in 1-Point QC Summary Report being switched.
- Clarity.io instrument support.
- Sample Editor now supports Data Grade / Approval system.
- If Batch Editor has slope/intercept blank, values are not changed.

Full release notes are available on our [Release Notes webpage](#).

Contact support@agilaire.com for download details. Note that users who are not already on Version 4.4 will need to install .NET Framework

4.8.

All requests for Support/ New Issue Submissions made via email should be sent to: [support@agilaire.com](mailto:support@agilaire.com)

**Agilaire Newsletter:**

Please share this Agilaire newsletter ([via this link](#)) with others that you believe would benefit from its contents:

As always, thanks again for your support, suggestions, and business!

Sincerely,  
Steve Drevik  
President, Agilaire, LLC  
& the Agilaire Team
