

AirVision / 8872 Version 4.10.161 Available!

Our late summer release is now available, with the following enhancements and improvements:

- Updates to follow additional USEPA guidance and formatting options for the EPA Asset Report, including price ranges vs. static price, Comment field, and the ability to mark individual assets as not included in the EPA Asset Report
- Updates for API changes in the Pyxis sensor.
- New Calibration Drift Graph report to graph the difference from zero/span.
- When an AV-Doc is attached to a work item during the completion action, that AV-Doc will be linked to the associated Logbook entry.
- Added more granular permissions for Asset Tracking
- Work Items can now have a supervisor designated and receive notifications of overdue work items.
- AQS Import tool can now import QA Flow Verification transactions.
- Favorite Query Blocks (tutorial video to come) to help manage reporting and editor selections in large networks when sites or monitors are added or removed.
- 8872 Channel Names now support up to 30 characters.
- AgileWeb now supports two marker shapes to distinguish primary sites from other sites (e.g., small sensor sites) across other layers in addition to the AQI layer.

Full release notes can be viewed at <https://agilaire.com/software-version-info/>

REMINDER FOR 8872 USERS

In order to ensure seamless data collection, monitoring of the 8872 hard drive and database space is crucial.

All 8872s include a SNL Status Report where users can check on space usage.

Site Node Logger Status Report

Site Name	Logger	Logger Id	Free Drive Space(GB)	Drive Space Low	Database Usage (%)	Database Size Warning	Status Message
Northbrook_ICORE	NORTHBROOK	NB	24.16	No	84.6	No	

This information can also be polled by AirVision using the XS command so a centralized review of deployed 8872s can be monitored.

The screenshot shows the 'General' tab of a configuration window. Under 'Basic Task Information', the 'Task Name' is 'Logger Poll Task' and the 'Task Description' is 'Data Logger Polling Task'. The 'Task Enabled' checkbox is checked. Under 'Logger Poll Options', the 'Logger' dropdown is empty, and the 'Logger Command' is 'XS - Poll 8872 Status'.

Additionally, on the Advanced tab of the XS poll task you can set a notification and if either hard drive or database space is at a warning level, the notification will be triggered. Subscribe desired users to the notification per standard processes

The screenshot shows the 'Advanced' tab of the configuration window. Under 'Retry Options', 'Number of Retries' is 0 and 'Interval between Retries' is set to 1 minute. Under 'Status Logging', 'Log Status Messages as' is set to 'Warning'. Under 'Notifications', there is a table with one row:

Notification Type	Enabled	Notification D
All Exceptions and Errors	☒	Site A 8872 drive and database status

Thank you kindly,

Steve Drevik
President, Agilaire, LLC & the Agilaire Team

We look forward to seeing some of you in the Pacific Northwest at the upcoming [PNWIS 2025 Air & Waste Management Association 63rd Annual Conference](#), October 15-17, 2025, where Agilaire is a Sponsor and Exhibitor.
