

Agilaire^{LLC}

February 2025

- **Windows 11 LTSC** (Long Term Support Channel) is now available for new orders of Model 8872s. This will be the default unless Windows 10 LTSC is requested (still available)

- **Upgrade kits** are available to upgrade existing Model 8872s to the new PCs (16GB RAM, 240 GB SSD) as a field installation (or return to factory, if you wish). Contact sales@agilaire.com for details, and let us know if any of the units you wish to upgrade are VGA model units (S/N less than 341). Don't hesitate to get in touch with us for a quote if you are interested in a Win 11 compatible PC retrofit kit.

- **AirVision and Model 8872 Software Updates (version 4.10):**

- Support for ACOEM gas analyzers
- Added "Close All Tabs But This" option to Home Menu
- Adding new cal drift chart that just shows amount of drift from expected value as bar chart.
- New Diurnal Plot report (graph multiple days as overlayed 24-hour plots for one selected parameter).
- New Completed Work Items History report with ability to select date range.
- Support for XS Qualifier code. If you're not ready to upgrade, this can also be supported in most versions via an update script, contact support@agilaire.com.

Conferences: It is regrettable that issues with certainty of funding are clouding our industry. Already, the Small Sensor Conference and Region IV Managers meeting have been cancelled. We hope that the funding issues are resolved by the courts or other means as soon as possible. Sharing of technical information and industry news is critical to maintaining our role in public health.

-**Air Newsletters from Agilaire**

If you know of any team member or associate that would benefit from receiving these newsletters, please register here:
